2016 - 2019

High School DRSVMIC, Moradabad

2015 – 2016

PROJECTS

Job Search Platform

Designed and developed a comprehensive job search platform using **Flutter**, offering users access to jobs, internships, and part-time opportunities. This is a large-scale, ongoing project that continues to evolve with new features and enhancements across both the website and mobile applications. The system includes **three mobile apps** and **four project modules** built for different domains, ensuring a robust and scalable ecosystem.

Mobile Application for Physio Customers

Developed a mobile application for physio customers using Flutter, providing comprehensive information and guidance through voice and video calls with trainers.

Website for Monitoring Websites

Developed a website using the Flutter framework during my internship, enabling users to monitor their websites through Upbot.

Indian_shop Website

Developed an E-Commerce website using Python, Django, HTML, CSS, Bootstrap, and SQLite3 database. Implemented features like COD and Net Banking for purchases, a Wishlist for saving favorite products, and Google Maps integration on the Contact page for location tracking.

Astrology Website

Developed a fully functional astrology website using **Django** and **SQLite**. I designed the complete UI and implemented key features such as a **Courses** page, **PhonePe payment integration**, and a **booking system** that allows users to schedule consultations with astrologers. Additionally, I created a **blog section** to share articles and updates.

Banking Automation System

Developed a desktop GUI application using Python's Tkinter library, allowing users to create new accounts, deposit and withdraw funds, update profiles, and recover passwords.

ACHIEVEMENTS

- Delivered multiple client projects on time with high quality.
- Led development tasks and supported team members when required.
- Integrated secure payment gateways in production systems.

LANGUAGES

English and Hindi
