

RISHI MORYA

Software Engineer | Flutter Developer | Android • iOS • Web

rishi.kr.mbd@gmail.com • +91-7617518700 • [LinkedIn](#) • [GitHub](#) • [Portfolio](#) • Moradabad, UP, India

PROFESSIONAL SUMMARY

Flutter Developer with 3+ years of end-to-end product experience building cross-platform mobile and web applications. Proficient in BLoC/Cubit, Clean Architecture, REST API integration, and real-time systems. Delivered production apps on Play Store and App Store. Hands-on with payment gateways (Razorpay, PayPal, PhonePe(Django)), real-time chat using WebSocket, AI chatbot integration, multi-role application architectures and multi-user authentication workflows. Experienced in leading feature development, production deployments, code reviews, client collaboration, and end-to-end product ownership.

WORK EXPERIENCE

Software Engineer — Flutter

Novas Arc Consulting Pvt Ltd | Oct 2024 – Present | Remote, India

- Architected and led Flutter development for a Emerge Job Search Platform with **3 mobile apps** and **4 web modules**, published on the Play Store and App Store.
- Built a real-time chat system with AI chatbot, live-agent escalation, multi-party claims, ticket management, and WebSocket-based messaging.
- Implemented **RBAC** for 4 user roles, integrated the **Razorpay** SDK, and developed secure payment and subscription workflows.
- Improved app performance through BLoC optimization, lazy loading, pagination, image caching, and configured **GitLab CI** for automated deployments.
- Led a team of 3, performed code reviews, collaborated with clients, and managed production releases.

Junior Software Engineer — Flutter

Novas Arc Consulting Pvt Ltd | Oct 2023 – Oct 2024 | Remote, India

- Designed, developed, and maintained the Physio Customer App for Android and iOS using Flutter, delivering appointment booking, trainer chat, user profiles, and appointment history features.
- Developed a real-time trainer-customer chat module with REST API integration, local persistence using Hive and Shared Preferences, and secure authentication with Flutter Secure Storage.
- Implemented appointment booking and scheduling features, and contributed technical documentation.

Flutter Developer Intern

Novas Arc Consulting Pvt Ltd | Mar 2023 – Sep 2023 | Remote, India

- Independently developed the **Upbot** website monitoring application in Flutter Web for real-time website uptime tracking.
- Integrated the **PayPal** payment gateway using a custom REST API bridge and delivered production-ready features in a 2-member team.

KEY PROJECTS

Emerge Job Search Platform

Flutter • Dart • BLoC • Clean Architecture • REST API • Firebase FCM

- Large-scale multi-role platform: 3 Flutter mobile apps + 4 web modules serving Applicants, Employers, Educators, and Admins — live on Play Store & App Store.
- Sole owner of Chat & AI Chatbot module: real-time messaging, 2-strike bot-to-agent escalation, multi-party claim, ticket raising, and session history with filters.
- Implemented Role-Based Access Control (RBAC), Razorpay payment integration, deep linking, and scalable module architecture across mobile and web applications.

Morung (Student Management System)

Flutter • Dart • BLoC • Clean Architecture • REST API • Hive • Razorpay

- Developed a Flutter-based student management application for Android and iOS, enabling attendance tracking, timetable management, course applications, hostel and transportation services, payment history, and student profile management.

- Implemented role-based workflows for Students, Parents, and Administrators, including parent access, attendance records, course application approval, and REST API integration for real-time data synchronization.
- Implemented offline functionality using Hive, enabling access to previously loaded data during network interruptions

Physio Customer App

Flutter · BLoC · REST API · Hive · Shared Preferences

- Developed a customer-facing Flutter application for Android and iOS, enabling physiotherapy session booking, trainer communication, and appointment management.
- Delivered a seamless experience for end users — offline-capable with real-time trainer chat, full appointment history, and secure authentication via Flutter Secure Storage and Hive.

Upbot — Website Monitoring Tool

Flutter Web · REST API · PayPal

- Built a Flutter Web dashboard for real-time website monitoring, integrating REST APIs to display uptime, availability, and health metrics through responsive dashboards.
- Engineered a custom PayPal payment integration for Flutter Web by overcoming SDK limitations and developed reusable, desktop-optimized UI components.

Astrology Booking Platform

Django · Python · SQLite · PhonePe · Full-Stack

- Architected and developed a full-stack astrology consultation platform from scratch, enabling online consultations, digital content, and secure payment workflows.
- Built key modules including astrologer discovery, slot booking, PhonePe payment integration, book ordering, course enrollment, blog management, user dashboards, and an admin portal for booking and order management.

Indian Shop — E-Commerce Website

Django · Python · SQLite · Bootstrap · Google Maps

- Built a Django-based e-commerce application with product catalog, wishlist, shopping cart, user authentication, and order management modules.
- Designed database models and implemented backend workflows using Django Object-Relational Mapping.
